**Winegard Special Products Division  
Exhibits In  
Upcoming VSAT Shows**

**BURLINGTON, Iowa – (May 10, 2009)** – This week the Winegard Company's Special Products Division will demonstrate how its newest generation of two-way VSAT satellite communications products are a lifeline in emergency settings at the 2009 Governor's Hurricane Conference (May 10 -15, Greater Fort Lauderdale/Broward County Convention Center, Fort Lauderdale, Fla.). Last year the conference and exhibits attracted emergency management professionals from federal, state and county offices. These included FEMA, the armed forces, weather service, fire, EMS, public works/utility, health, medical, law enforcement, agricultural, emergency management and transportation departments, and volunteer and non-profit organizations. Winegard representatives will be available at the show (Booth 429) to discuss specific applications and answer any technical VSAT questions.

Later in the year, Winegard will illustrate how its VSAT products specifically meet the rigorous demands of the offshore industry at the 9th Annual Offshore Communications Conference & Exhibition (Nov 3-5, 2009, Marriott Houston Westchase, Houston, Texas). The one-of-a-kind networking event connects offshore oil, gas and maritime industries with the latest communications and information technologies. This year's event promises a completely new format, allowing for a more discussion-based forum. Communications and IT professionals will learn about the latest practices, products and services available in their ever-changing industry and find solutions to some of their most difficult issues. Representatives from Winegard (Booths 51 and 52) will be on hand to answer any technical VSAT questions.

## **About Winegard**

Winegard Company has been manufacturing quality television and radio reception products for more than 50 years. Headquartered in Burlington, Iowa, Winegard enjoys a worldwide reputation that is based on many industry "firsts," including the all-channel Yagi TV antenna, 82-channel antenna, antenna-mounted preamplifiers, antenna amplifiers, the anodizing process, the perforated aluminum satellite antenna and the RV television antenna, among others.

Winegard Company currently manufactures and markets five distinct product lines:

**Special Products:** Two-way VSAT satellite communications systems for the enterprise, energy, and emergency response industries in 0.84 meter, 0.96 meter, 1.2 meter and 1.8 meter configurations.

**Mobile Television Reception Products:** Recreational vehicle, truck, marine, and automotive applications. Digital and HD satellite TV antennas ranging from manual crank-up models to fully automatic stationary and in-motion systems with GPS/DVB. DTV and HDTV bi-directional and omni-directional over-the-air antennas. Ground antenna mounts and accessories.

**Satellite TV Antennas and Mounts:** Residential antennas ranging in size from 46 cm to 1 meter, including mounts and accessories.

**Over-the-Air DTV/HDTV Antennas:** DTV and HDTV VHF/UHF/FM TV antenna systems, distribution and preamplifiers, power supplies and accessories.

**Telemetry:** Medical and data antenna systems, distribution amplifiers, power supplies and accessories.
